

Professional Pressure Measurement Interpretation

1-Day Course

Next Availability: 17th August or 16th November £299pp* + VAT

Course Content

Introduction to Pressure

Types of Sensor	1
Types of pressure (mean,max,pressure time integral).....	2

Plantar Pressure Plate tools and what they mean

Centre of Pressure	3
Peak Pressures	4
Vertical Force-Time Curves.....	5
Mean Pressure Curves.....	6
Medial-Lateral Force-Time Curves.....	7
Video Integration.....	8
Study through phases.....	9
Speed and Acceleration.....	10

Data Interpretation and Foot Profiling

Foot type by Arch.....	11
Foot Mobility.....	12
Foot movements – Pronation/Supination.....	13

Injury Patterns and Pathologies

Gait line and pressure deviations.....	14
Common Clinical Pathologies.....	15

Interventions and Tracking Improvements

Orthotic design and Materials.....	16
Manipulations and mobilisations.....	17
Conditioning.....	18
